\*\*For Analytics Server specification requirements, see <http://help.pentaho.com/Documentation/5.1/OD0/160/000>

\*\*\* Alfresco Desktop Sync will replicate content on local desktops for users with the appropriate access. If replication outside the Alfresco repository is not allowed by your content policy you should not deploy Alfresco Desktop Sync.

This version of Alfresco Desktop Sync does not support Smart Folders and Records Management. If Records Management controlled content is synced note that moving, renaming or hiding of declared records may not be reflected on the desktop client."
